EDUCATION

Bachelor of Technology in Information Technology

Sri Ramakrishna Engineering College

September 2024 - Present

Coimbatore, Tamil Nadu

Senior Secondary Education

Yuvabharathi Public School

June 2022 – April 2024

Coimbatore, Tamil Nadu

INTERNSHIP

Full-Stack Developer

Indian Institute of Technology – Madras

Chennai, TN, India

Full Time | September 2025 – Present

- i. Anantam Control Station is a Ground Control Station designed to operate unmanned vehicles including drones, rovers, submarines, controlling swarming.
 - Eliminated frontend control lag by migrating architecture from HTTP to WebSocket (Socket.io), enabling real-time drone telemetry streaming without connection overhead.
 - Engineered optimised data pipeline to handle high-velocity MAVLink telemetry from drone swarms in real time.
- ii. ZIIP is a Geospatial analytics platform capable of performing 2D aerial imaging to 3D spatial terrain.
 - Designed knowledge graph structures to store and query geospatial timeline data efficiently, enabling accurate historical state reconstruction across aerial imaging sessions.
 - Automated EC2 deployment pipeline using custom shell scripts, eliminating manual setup and reducing redeployment time from scratch.

Full Stack Developer

Nexoris Solutions

Coimbatore, TN, India

Full Time | June 2025 – July 2025

- i. eXOR is a product dashboard analytical platform managing and tracking product performance in sales, development, marketing and tools to analyse data in product's scope.
 - Refactored server-to-dashboard data pipeline, resolving structural data management issues and improving metrics usability across the analytics platform.

PROJECTS

i. eAttendance – Computer Laboratory Attendance System

September 2025 - Present

- eAttendance is an automatic attendance collector in laboratories providing a computer to individual students.
- Built a boot-triggered attendance system that automatically maps student roll numbers to system IDs, eliminating manual notebook-based attendance in computer laboratories.
- Integrated all lab systems into a centralised server to aggregate and manage attendance data across the entire laboratory.

ii. EDUDOTE - Classroom Timetable Management System

September 2025 - October 2025

- Edudote is a full-stack academic management platform that automates complex classroom scheduling using AI while providing a centralised hub for managing faculty data and administrative workflows.
- Developed AI powered constraint engine that analyses data of faculties and their individual timetable developed using Ollama and cloud AI models to allocate faculties classes for a week.

- Designed approval and regeneration of timetable with easy editing to allocate and track shifts in classes to accommodate unexpected situations.

iii. Custom School Bell System

October 2024

- An autonomous plug and play system built on Raspberry Pi to schedule and broadcast custom audio via existing sound systems.
- Architected a headless deployment model requiring zero configuration, interfacing directly with existing PA infrastructure via an analog AUX output.
- Deployed a background daemon service to continuously run the system to monitor real-time clock data and trigger audio playback in the PA sound system.

SKILLS & TOOLS

Hard Skills:

- **Programming Language:** TypeScript, JavaScript, Python, Java, C, C++.
- **Frontend Stack:** HTML, CSS, Vite, React.js, Next.js, Astro, Zustand, SCSS, Websockets, jQuery, Tailwind CSS.
- **Backend Stack:** Bun, Node.js, Mavlink, Express.js, Hono, Elysia, Puppeteer, Socket.io.
- **Hardware Stack:** Raspberrypi, ESP32, Arduino.
- **Databases:** PostgreSQL, MySQL, SQLite, Redis, MongoDB, Supabase, Firebase.
- **Hosting & Payments:** AWS, Vercel, Netlify, Razorpay.
- **Others:** Git, Figma, Docker, Linux, Blender, WebODM, Ollama, LMStudio.

Soft Skills:

Communication, Problem-Solving, Adaptability, Collaboration, Attention to details, Continuous Learning, Cross-Domain Agility.

ADDITIONAL INFORMATION

- **Languages:** English, Tamil, Kannada.
 - **Certifications:** Infosys Figma Training, Mobile App Development using Flutter, Agile Project Management and Tools for Product Managers, Product Management 101, Networking and Web Technology
-
